Subject: be fair with Microsoft

To whom this concern:

I have been following this case since it all started. I know what this is all about.
Companies like Oracle, Sun, and Netscape, are after the demise of Microsoft.
I hate to think what will happen to the computer industry, it will be too costly for the most
of us with nothing standard.
Where were these companies when the PC industry was getting started.
These come lately companies are only after the free for all, after Microsoft is defeated.

Thanks for reading this.
